

HOUSING DIGNITY · MILPITAS HACKS

YNorth

Find your way [home](#).

01

THE CHALLENGE

People don't stay homeless because help doesn't exist — they stay homeless because the **path to it is hidden.**

- ✦ A dozen separate waitlists & forms
- ✦ A Coordinated Entry system
nobody explained
- ✦ Offices that don't talk to each other
— and a phone call you're terrified
to make

02

THE IDEA

A north star out of the maze.

NOW The one thing to do today — get to safety, call 211.

SOON Replace the ID, start Coordinated Entry, gather the docs.

HOME The road to a stable place — vouchers, applications, follow-ups.

02

THE IDEA · LIVE

Tell it where you are. Get your path.

- ✓ Speak it or type it — **any language**
- ✓ Your path: **Now · Soon · Home**
- ✓ A documents checklist that opens doors
- ✓ “This helped” teaches the model
- ✓ Quick-tap prompts when words are hard
- ✓ “Explain this simply” on any step
- ✓ Progress you can see and own
- ✓ Share your path with a caseworker

02

THE IDEA · TRUTH & DIGNITY

It **cannot lie** — and it never keeps your story.

- ✦ Only real, universal systems — never an invented shelter
- ✦ Real local orgs, researched live and **cited** — anywhere in the world
- ✦ Your story lives on your device — nothing on a server

✦ FEATURE SPOTLIGHT · THE CALL

Can't face the call? YNorth makes it **for you.**

© YNORTH IS CALLING FOR YOU

Calling 211... navigating the menu · on hold

Asking on your behalf: open family-shelter
beds + your Coordinated Entry access point

✓ Done. "Here's what they said — and your
next step."

Why it stands out: removes the call entirely — no
hold time, no language barrier, no shame. Only ever
calls **real, verified lines**. Pure **dignity + real-world
impact**.

✦ FEATURE SPOTLIGHT · THE NETWORK

A neural network that learns what gets people housed.

YOUR SITUATION

lost my job

facing eviction

have kids

on-device
learning
model

HELP THAT WORKS

free legal aid

rent assistance

family shelter

Why it stands out: every “this helped” is one gradient step — and it learns across all users. **Collective intelligence for getting home.**

03

THE PROCESS

How we built it — in a day.

Next.js + TS + Tailwind + Framer Motion

Gemini 2.5 Flash — path + plain language

Grounded search — real local orgs, cited

Web Speech API — voice intake

Python AI voice agent — calls for you

On-device model + Supabase global brain

Real-resource safety layer

No-key fallback — demo never dies

04

THE IMPACT

We remove the barrier that keeps people stuck.

HOUSING DIGNITY TRACK FIT

- Real impact** • Turns the navigation maze into one clear path — voice, any language, anywhere in the world.
- Tech depth** Grounded real-resource AI + an AI voice agent + an on-device neural network.
- Creativity** Not a chatbot — a compass you own that calls for you and learns for the next person.

05

RECOGNITION & GROWTH

A working product that gets smarter every day.

- ✦ Shipped in a day: multilingual, voice-first, privacy-first — works worldwide
- ✦ The network compounds: every “this helped” lifts the next person's path
- ✦ Collective intelligence for getting home.

From demo to civic infrastructure.

- ✦ Pilot with a 211, city housing dept, or library
- ✦ Verified-resource coverage, city by city
- ✦ Scale the voice agent + a caseworker dashboard
- ✦ Offline kiosk mode for shelters

Our ask: one pilot partner to put YNorth in real hands.

THE VISION

**No one stays lost in the
maze just because they
couldn't find the door.**

YNorth points home.
