

HOUSING DIGNITY · MILPITAS HACKS

YNorth

Find your way [home](#).

THE PROBLEM

People don't stay
homeless because
help doesn't exist.

They stay homeless
because the **path to it**
is hidden.

It's not missing help. It's a maze with no map.

- ✦ A dozen separate waitlists
- ✦ Forms that need an ID you lost
- ✦ A Coordinated Entry system nobody explained
- ✦ Offices that don't talk to each other

THE SOLUTION

A north star out of the maze.

NOW The one thing to do today — get to safety, call 211.

SOON Replace the ID, start Coordinated Entry, the docs you'll need.

HOME The road to a stable place — vouchers, applications, follow-ups.

LIVE DEMO

**Let me show you
someone find their
path — right now.**

Voice intake → personalized path →
“explain this simply” → share with a
caseworker.

WHY YNORTH IS DIFFERENT

It cannot lie to you.

- ✦ Never invents a shelter or hotline

Only real, universal U.S. systems — 211, HUD, Vital Records, SSA, 988

- ✦ Your story lives on your device

Nothing on a server. We can't leak what we never hold.

IT COMPOUNDS

Every use makes the next path better.

A tiny on-device learning brain
promotes the resources that actually
got people housed. Collective
intelligence for getting home.

HOW IT REACHES PEOPLE

Civic infrastructure, free to the person.

✦ 211s · city housing
depts · libraries ·
shelters · social
workers

Our ask: **one pilot partner to put YNorth in real hands.**

THE VISION

**No one stays lost in
the maze just because
they couldn't find the
door.**

YNorth points home.
